

Trend Micro™

HOSTED EMAIL SECURITY

Stop spam. Save time. Sleep easy.

Email is mission critical, but spam and email-based malware volume is growing exponentially; it's difficult to keep up. In addition, with the rise of targeted spear-phishing, even your savviest employees can mistakenly click on a malicious link and expose your enterprise to cybercrime. At the same time, other critical IT projects are demanding your attention, but that doesn't mean you can afford to neglect email security maintenance and potential targeted attacks.

Trend Micro™ Hosted Email Security is a no-maintenance-required solution that delivers continuously updated protection to stop spam, malware, spear-phishing, and advanced targeted attacks before they reach your network. Email Encryption is included in the base offer.

Hosted Email Security customers are covered by a contractually-binding Service Level Agreement (SLA). If we don't deliver, you're eligible for money back.¹

Hosted Email Security protects Microsoft Exchange, Microsoft Office 365, Google Apps, and other hosted and on-premises email solutions. It protects more than 50,000 companies around the globe.

PROTECTION POINT

- In the cloud

THREAT PROTECTION

- Spam
- Viruses
- Spyware
- Spear-phishing
- Targeted attacks

“We signed up for the free 30-day trial license of Trend Micro Hosted Email Security and our spam problem disappeared overnight.”

Rico Horsley, Partner
 Metro Law

WHAT HOSTED EMAIL SECURITY CAN DO FOR YOU

Stops spam and targeted attacks

- Helps you reclaim productivity and bandwidth
- Rated #1 for stopping spam and phishing attacks, achieving the highest catch rates in [independent competitive tests by Opus One](#)
- **99%+ spam blocking** with no more than .0003% false positives and zero email-based viruses
- Protects organizations from spear-phishing and advanced targeted attacks

Saves time

- Helps free your time to implement critical business initiatives
- No maintenance required since Trend Micro experts continuously implement all updates, patches and hot fixes 24x7
- Spam quarantine managed by end users— not IT staff

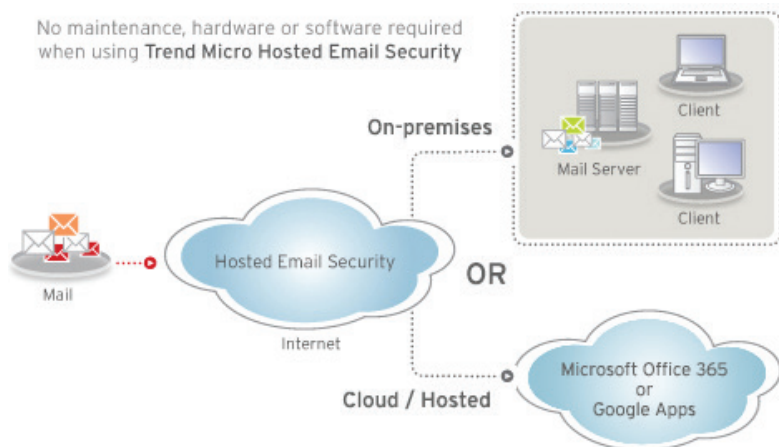

Gives you peace of mind

- **100% service availability** with no more than one minute of mail delivery latency
- Included policy-based encryption automatically enforces compliance requirements and protect confidential information
- Smart Protection Network™ cloud-based global threat intelligence rapidly identifies new threats and continuously improves protection against known threats
- Included 24x7 technical support gives you extra piece of mind

SERVICE LEVEL AGREEMENT PROVISIONS	HOSTED EMAIL SECURITY
Availability	100% uptime
Virus protection	Zero email-based viruses
Spam-blocking effectiveness	99% or better
False positives	No more than .0003%
Support responsiveness	Matches incident severity
Email delivery latency	No more than a one minute latency

¹ Money-back remedies are defined in the Trend Micro Hosted Email Security Service Level Agreement.

No maintenance, hardware or software required when using Trend Micro Hosted Email Security

Office 365

Protection from spear-phishing
 See how easy it is to integrate Trend Micro Hosted Email Security with your Office 365

Targeted Attacks Need a Custom Defense

Trend Micro Hosted Email Security provides protection against targeted invasions using enhanced social engineering attack protection, web reputation, and new detection engines. It also employs cloud-based threat analysis to block highly targeted email attacks by using exploit detection and sandboxing. Integration of these components provides a custom defense that enables you to detect, analyze, adapt, and respond to targeted attacks. This comprehensive targeted attack protection is included in Hosted Email Security at no extra charge.

Social Engineering Attack Protection

Detects spear-phishing emails by correlating email components, such as the header, body, and network routing using our new [Social Engineering Attack Protection](#) technology.

Enhanced Web Reputation

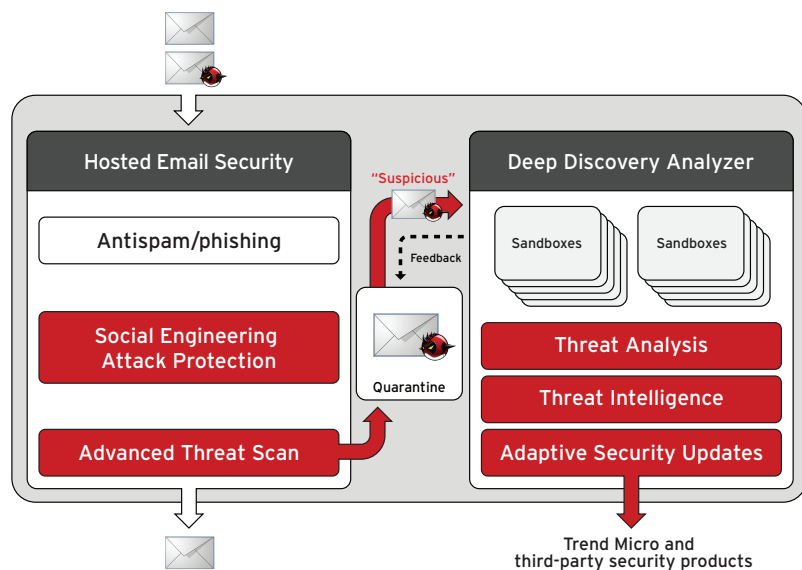

Enhanced technology from Smart Protection Network scans URLs embedded in emails and blocks URLs leading to malicious sites.

Advanced Threat Scan Engine

Detects advanced malware in PDF, MS Office, and other documents using static and heuristic logic to detect and examine abnormalities in addition to known and zero-day exploits.

Deep Discovery Analyzer, a component of the Trend Micro™ Custom Defense Solution

Provides automatic in-depth simulation and analysis of potentially malicious attachments including executables and common office documents in a secure sandbox environment hosted by Trend Micro.
