

# Microsoft Office 365 Backup

Microsoft Office 365 does not include backup! so protect your Microsoft Office 365 mailboxes, calendars, SharePoint, OneDrive and more with Nordic Backup for Microsoft Office 365.

Agent-less or agent-based deployment gives you flexible solutions for a variety of workflows. Scheduling allows you to backup anytime or on a recurring schedule you set. Restore data to your original domain or to an alternate domain.

Retention and Versioning policy settings allow you to keep deleted data for periods that satisfy any requirements. Point-in-time recovery allows you to restore data from any time in which a backup was executed. Multiple versions can be recovered in a single restore operation.

Use Nordic Backup Office 365 backup as stand-alone with unlimited storage at a low cost per user, or add it to Nordic Backup Advanced or Professional Backup to get even lower rates.
